Due to popular demand, we have developed *NUBBLE! EXPRESS*, a new faster version of our compulsive arithmetic game Nubble! The Nubble! Express board is composed of just 25 hexagons. The rules are the same as Nubble!, except that numbers are formed by combining the scores on three (5-sided) dice rather than four (6-sided) dice. A full game of Nubble! Express can be played as a maths lesson starter or plenary. Nubble! Express is also perfect for developing the confidence of less able pupils.
