

Trigonometry

Trigonometry has been designed to provide pupils with unlimited practice in answering trigonometry problems. As with the other titles in the series, the parameters for each question are randomly generated. The program then enables pupils to work on-screen step-by-step towards the correct answer.

The thirteen sections of Trigonometry cover the whole of this part of the curriculum.

Pythagoras' Theorem

- Finding the Hypotenuse
- Finding a Side
- Mixed Questions
- Pythagoras' Theorem Test

The Sine Rule

- Finding a Side
- Finding an Angle

Right Angled Triangles

- Sines
- Cosines
- Tangents
- Mixed Questions
- Right Angled Triangles Test

The Cosine Rule

- Finding a Side
- Finding an Angle
